RE: FY 2018 Q1 CSR Variance Report

Introduction

Pursuant to Nevada Revised Statutes (NRS) 388.700(4), the State Board of Education is required to submit a quarterly Class-Size Reduction (CSR) report to the Interim Finance Committee (IFC) on each variance requested by a school district during the preceding quarter; charter schools are exempt. The report must include an identification of the elementary school for which a variance was granted, as well as the specific justification for the variance.

- There are two types of CSR programs funded in Nevada:
 1. Regular CSR: Pupil-teacher ratio; Kindergarten – 16:1; Grades 1 and 2 – 17:1; and Grade 3 – 20:1. This program is currently funded through sections 15 and 16 of S.B. 544
 2. Alternative CSR: School districts which are located in a county whose population is less than 100,000 may select the Alternative CSR program which provides flexibility in implementing pupil-teacher ratios in grades 1 through 6 (as applicable, grade 5 and 6 must be included in the elementary school to be counted) for - Kindergarten – 16:1; Grades 1 through 3 – 22:1 and Grades 4 through 6 (as applicable, grade 5 and 6 must be included in the elementary school to be counted) – 25:1. This program is authorized through NRS 388.720

In fiscal year (FY) 2018, Section 12 of S.B. 544 provides that funding for CSR shall pay for the salaries and benefits of not less than 1,944 teachers to meet the required ratios. CSR provides sufficient funds for school districts to meet required ratios at a district level. Remaining funds are allocated to the lowest performing schools with variances first, with any residual distributed to the remaining schools.

Executive Summary

For the first quarter of FY18, there were no material changes to grades 1 through 6 compared to fourth quarter FY17. The discontinuation of the kindergarten class size reduction program pursuant to SB515, had a significant impact on the number of kindergarten variances. As a result of the discontinuation, the prescribed ratio decreased from 21 to 1 to 16 to 1 per NRS 388.700. Thus, the number of kindergarten class size variances increased dramatically. However, kindergarten class sizes themselves have remained relatively the same at 18.46 compared to 17.96 in Q4 FY17.

Scope of Report

Attached is the report of variances for the first quarter of FY18. The report provides a summary of variance requests by school district and the specific variance justification by school. For each variance request, the following information is presented:

- Class size ratios by school and grade.
- Star rating pursuant to the Nevada School Performance Framework (FY17).
- Demographic data such as, percent that is low income (FRL) and percent who are English Language Learners (EL). Figures below 10% are suppressed for student protection.

Statewide Summary of Variances & Justifications

Variance requests are categorized into four standard potential justifications, and include funding limitations, difficulty hiring teachers, facility limitations, and other. Any or all of these justifications are accepted. Funding limitations was the most common variance justification, which was a factor in 95.9% of variances requested by the districts. Difficulty hiring teachers was the second most common justification at 91.8%, followed by facility limitations at 79.6%. While 78% of district school variance justifications cited all three rationales.

The districts were broken into their grouping type, Large, Centralized, Rural, Small, and Very Small, according to the DSA equity allocation model definitions and were analyzed for commonalities. Clark and Washoe are grouped in the large category; Carson City, Churchill, Douglas, and Lyon are grouped in the centralized category. Elko, Humboldt, Lander, Nye, and White Pine are grouped in the rural category. Lincoln, Mineral, Pershing, and Storey are grouped in the small category. Esmeralda and Eureka are grouped in the very small category.

Thirteen of the districts reported funding limitations as a justification for variances. In rural, small and very small districts, according to districts funding does not meet the level needed to provide enough incentive to hire teachers in such remote locations. In centralized and large districts they reported not being able to offer competitive salaries to compete with neighboring states. The funding limitation is a factor in the second most common justification of hiring difficulty, which was reported most in large and rural districts. Six districts reported all three justifications; this includes all districts in the large grouping, two in the rural grouping, and one in the small grouping.

District Grouping Variance Justification

District Grouping	District	Facility	Hiring	Funding	Other
<i>Large</i>					
	Clark	X	X	X	-
	Washoe	X	X	X	-
<i>Centralized</i>					
	Carson City	X	X	X	-
	Churchill	-	-	X	-
	Douglas	-	-	X	-
	Lyon	X	-	X	-
<i>Rural</i>					
	Elko	X	X	X	-
	Humboldt	-	-	-	-
	Lander	X	X	X	-
	Nye	-	X	X	-
	White Pine	-	X	X	-
<i>Small</i>					
	Lincoln	X	X	X	-
	Mineral	-	-	-	-
	Pershing	-	-	X	-
	Storey	-	-	X	-
<i>Very Small</i>					
	Esmeralda	-	-	-	-
	Eureka	-	-	-	-

District Level Analysis of Variances

The cited issue for the two most common justifications is a miss match between funding and actual salaries and an inability to hire qualified teachers. Districts cite a lack of funding to provide enough incentives to hire in rural districts and to be able to recruit qualified teachers from competing states.

Carson City is experiencing facility limitations in grades K, 1, 2, 3, and 5. In addition, the district is experiencing difficulty hiring in in grades 1-5. There is a shortage of qualified teachers, and recruitment has been difficult, but ongoing. In regards to funding, Carson City is dependent on DSA and CSR dollars to fund teachers to comply with NRS 388.720. If the ratios are one or two students above the prescribed ratios, it is not fiscally neutral to hire an additional teacher to meet the ratios. Another reason the district is requesting a variance is due to how the ratio is calculated. Currently, special education students are included in the pupil counts. However, per NRS 388.700 (1b), special education teachers cannot be included when calculating the class size. Therefore, in some cases, the ratios exceed the prescribed ratios due to teachers not being eligible for count.

Bordewich Bray 3rd grade variance has two Special Education teachers and one English as a Second Language teacher assigned to support inclusion. In addition, two self-contained Special Education classrooms reduce teacher-student ratios for grades 1 and 2. A Literacy coach and Math coach along with Music, Technology, and Physical Education teachers support classroom instruction. These licensed full time equivalents (FTE) assigned to Bordewich Bray are not accounted for in the teacher-student chart at the top of this form.

Fritsch Elementary School has the additional systems in place to support academic achievement for the 2017-18 school years: Homeroom teachers teach core content areas; music, P.E. technology teachers, and the librarian provide support systems & teachers outside of core content. Two Special education teachers and their paraprofessionals provide support to students in core & non-core content areas. One ESL teacher, plus a para professional provides support to EL students above regular classroom instruction.

Churchill is experiencing continued budget shortfalls and a reduction in enrollment (18%) and a corresponding reduction in DSA funding over the past few years. Churchill has had a significant reduction in the ending fund balance and has been fiscally unable to maintain staffing rates required for the prescribed pupil-teacher ratio. Secondary class sizes have also increased due to the financial shortfall.

Clark is experiencing all three categories of variance justifications. Elementary schools do not have an adequate number of classrooms to hire additional teachers. Additionally, many schools do not have sufficient physical space to allow for the additional of portable units without impacting playground and parking space.

In regards to difficulty hiring, there is a national shortage of teachers. Teacher education enrollment has dropped 35% between 2009 and 2014. Nevada's higher education teacher candidate programs reported 768 program completers in 2014-2015, a decrease from 950 completers in 2010-2011. The district relies heavily on recruitment from California to fill the shortage created within the state. California's program completion has decline by approximately 21% from 2010-2011 to 2014-2015.

Lastly, if Clark County was able to hire the number of teachers needed to meet the prescribed class size ratios, CSR funding would not cover the salaries and benefits at current levels. Nor would there be sufficient funding to cover the related costs and requirements to supply the additional classrooms.

Douglas is experiencing funding limitations. When the funding shifted from a district-wide average class size reporting to a school-level approach, no new allocations were added to the CSR funding formula to assist with assuring that ratios are met at every grade level. When KCSR was discontinued, it now costs the district an estimated \$77,000-\$80,000 to hire an additional teacher to maintain the 16:1 ratios now prescribed. The district has provided a 4-hour aide to assist in kindergarten classrooms.

Elko is experiencing facility limitations in grades k, 2, and 5. Additionally, they are having difficulty hiring due to being in a rural location and do not have enough funding to provide hiring incentives. Despite SB511 and other grant funding allowing the district to offer \$10,000 signing bonuses in FY16, the district still has 4 positions being filled by long-term substitutes. Lastly, facility limitations in grades k, 2, and 5 do not support hiring an additional teacher.

Esmeralda does not qualify for CSR funding as their baseline ratios are lower than the ratios prescribed by law. For example, the third grade baseline ratio is 15 to 1. Since a district must maintain baseline ratios with non-CSR funded teachers in order to qualify for funds, the baseline ratio is lower the ratio prescribed in law, the district would not require additional funding needed to meet the prescribed ratio of 20 to 1 on the regular plan.

Eureka experienced no class sizes above the prescribed ratios and did not need to request variances.

Humboldt is experiencing facility limitations in grades 1, 3, 5, and 6. Additionally, as ratios are 0.8 and 0.32 above the prescribed ratios, it is not fiscally neutral to hire an additional teacher. Further, some ratios do not factor in special education positions that are utilized in each grade level in a “push in” capacity. The district is monitoring class size ratios and will work towards lowering the ratios without utilizing special education factored as a push in. However, it is not fiscally neutral to hire an additional teacher in grades which are one or two students above the prescribed ratios.

Lander is working on remodeling existing classrooms to provide for more classrooms in order to reduce class sizes. Additionally, the current budget does not allow the district to offer additional incentives to recruit and hire qualified teachers. Lander County’s budget is stretched to the limit.

Lincoln is experiencing difficulty hiring due to being a rural location. The district is unable to provide enough financial incentives to recruit qualified teachers. Lincoln is also experiencing facility limitations in grades 2-3, as the district does not have enough classrooms to be able to hire an additional teacher.

Lyon is experiencing facility limitations in grades 1-3 and 5-6. With the all-day kindergarten and pre-k expansion, the facilities are limited; this limits the ability to hire additional teachers to reduce classes above the prescribed ratios. Additionally, it is not fiscally neutral to hire an additional teacher when the district is one or two students above the prescribed ratio. This is largest contributing factor as it costs \$80,000 to hire an additional teacher.

Mineral experienced enrollment higher than anticipated. However, it is not fiscally neutral to hire and additional teacher at this time.

Nye has had difficulty hiring and retaining qualified teachers due to budget constraints. Being a rural community there are very few amenities and limited housing options. Therefore, teachers often commute. Currently there are no incentives to offset the travel costs. The district also experiences a high level of student transiency which makes it difficult for the district to respond to the changes.

Nye County experienced major staff cuts during the recession, and the district's economy has been slow to recover. As funds become available, they have been allocated to critical positions as prioritized by the district.

Pershing has experienced a decline in enrollment, with no growth projected. As the district's enrollment decreases, so does DSA funding. Thus, it is not fiscally neutral to hire additional teachers when ratios are only slightly above the prescribed ratios. The district will continue to monitor class sizes and utilizes paraprofessionals to provide support.

Storey County asserts that hiring an additional teacher would result in deficient financing based on their current ratios being a few students above the prescribed ratio.

Washoe County has been approved to collect sales tax to assist with capital needs, and is in the process of building new schools. However, these resources are not an immediate fix. In the interim, the district utilizes team teaching when possible. Additionally, Washoe County is experiencing the same problem, as many districts across the nation, there is a shortage of qualified instructors. The Nevada teacher education programs are not producing enough graduates to fill the number of vacant positions.

Lastly, WCSD is facing a budget deficit as costs continue to exceed revenues. Use of reserves to balance the budget makes this an ongoing concern and full implementation of class size reduction requirements would only further increase deficits.

White Pine has experienced a decline in enrollment over the last two years. As a result, the district is struggling to maintain educational services for all grades K-12. In response, the district is reducing its spending. Existing classrooms are being remodeled into two classrooms. Additionally, the district does not have the fiscal resources to provide enough incentives to recruit and hire qualified teachers in such a rural location. It is not fiscally neutral for the district to hire an additional teacher to meet the prescribed ratios when the district average is within one student of the prescribed ratios.

School Level Analysis of Variances

Eleven school districts have variances in 1 and 2 star schools based on the most recent information published December 15th, 2017. There are 148 1 and 2 star schools reported schools in the first quarter of FY18. Out of the 148 total 1 and 2 star schools, 139 of those schools have variances with a total of 348 school and grade level variances in grades kindergarten through 6th grade as applicable.

Count of Variances by District in 1 and 2 Star Schools

School District	Total Number of Schools (All Star Ratings, Grades K-6)	Total Number of 1 and 2 Star Elementary Schools	Number of 1 and 2 Star Schools with Variances	% of 1 and 2 Star schools with Variances	Total Number of Variances in 1 and 2 Star Schools (K Only)	Total Number of Variances in 1 and 2 Star Schools (K-6)
Carson	6	2	2	100%	2	5
Churchill	3	1	1	100%	0	1
Clark	221	89	86	96.6 %	82	225
Douglas	7	0	0	0%	0	0
Elko	12	8	8	100%	7	12
Esmeralda	3	0	0	0%	0	0
Eureka	2	0	0	0%	0	0
Humboldt	9	4	3	75%	2	5
Lander	2	0	0	0%	0	0
Lincoln	4	1	0	0%	0	0
Lyon	12	6	6	100%	5	19
Mineral	2	2	1	50%	1	3
Nye	11	3	3	100%	1	5
Pershing	2	1	1	100%	1	2
Storey	2	0	0	0%	0	0
Washoe	62	28	25	89.3%	24	65
White Pine	4	3	3	100%	3	6
Total	364	148	139	93.9%	128	348

There were 364 total schools (1-5 star schools, including unrated schools) of which 337 had variances in the first quarter. Within these schools, there were 667 variances in first through sixth grade compared to 684 in the fourth quarter of fiscal year 2017. Including kindergarten, there were 983 variances statewide. Kindergarten variances increased by 127.3% from 139 in Q4 of FY17 to 316 in Q1 of FY18. A large proportion of the increase in variances is directly related to discontinuance of the kindergarten CSR program, which defaulted to a prescribed student-teacher ratio of 16 to 1 in kindergarten per NRS 387.700.

In addition, it is important to note, that due to a methodology change in calculating class size ratios, the class size ratios also slightly increased. The Department is now utilizing average daily enrollment (ADE) instead of average daily attendance (ADA) when calculating the student to teacher ratio in order to align with current reporting procedures. This results in a slightly higher class size ratio due to evaluating total enrollment instead of attendance.

Total Variances by District-Regular Plan

School District	<i>Total Schools with Variances (K-3)</i>	<i>Total Classroom Variances (K)</i>	<i>Total Classroom Variances (1-3)</i>	<i>Total Classroom Variances (K-3)</i>

Total	337	316	667	983

District Level Analysis of Variances

There were 135,587.08 students in grades kindergarten through 6th grade in the first quarter. For which, there were 1,885.24 CSR funded teachers and 4,808.32 non-CSR funded teachers for 6,693.56 teachers. The total aggregate class size ratio is 20.25. The district level class size ratios for the first quarter are listed below by grade. Bolded values exceed the prescribed ratio. All but three districts exceed the prescribed ratios, Eureka, Esmeralda, and Storey. The grade with the most variances is kindergarten, with 13 of the 17 districts exceeding the prescribed ratio of 16 to 1 student to teacher ratio. The grade with the second most variances is second grade, with nine out of 17 districts exceeding the prescribed ratio (17 to 1 for the regular plan, and 22 to 1 for those on the alternative program).

District Level Class Size Ratios

District	K	1 st	2 nd	3 rd	4 th	5 th	6 th
Churchill-A	22.75	21.02	22.57	23.65	25.81	23.78	N/A

White Pine-A	21.72	23.28	23.71	21.41	17.38	20.91	N/A
Total Ave. (State)	20.62	19.05	19.43	21.52	22.73	20.63	23.52

* Esmeralda does not qualify for CSR funds due to their baseline ratios being less than the prescribed ratios. The provided figures are purely informational. Alternative plan participants are identified with an "A", while regular plan participants are identified with an "R".

Concluding Remarks

There are no significant changes in the number of class size ratio variances requested with the exception of kindergarten, in the first quarter of FY18. In regards to kindergarten class size ratio variances, these are the result of a change in methodology rather than the result of increased class sizes. Due to the discontinuation of the kindergarten class size ratio program, the kindergarten class size ratio decreased from 21 to 1, to 16 to 1 as prescribed in NRS 388.700(1). Additionally, any marginal increases in class sizes can be attributed to a change in methodology in calculating class size ratios. This change in methodology is to align reporting with procedure and is a necessary update.

The attached variance request report is sorted by CSR plan type, school district, and school alphabetically. For example, regular plan participants are grouped first, then alphabetically by district and school. Bolded values identify classrooms over the prescribed ratio; the number listed indicates the actual class size ratio. Each bolded value represents a variance requested by the district. Individual variance requests are available upon request.

The Department is committed to working with the State Board and school districts/charter schools to decrease the number of variance requests, particularly in high need schools. I hope this information is useful to you. If you have any questions, please do not hesitate to contact me via email at mhanke@doe.nv.gov or via phone at 775-687-9236.
