Please refer to the NEPF Protocol Document for additional information regarding the NEPF protocols and processes.

General Questions

What are the goals of the NEPF?

Goal 1: Foster student learning and growth.
Goal 2: Improve educators’ effective instructional practices.
Goal 3: Inform human capital decisions based on a professional growth system.
Goal 4: Engage stakeholders in the continuous improvement and monitoring of a professional growth system.

What is the purpose of the NEPF?

The overall purpose of the NEPF is to identify effective instruction and leadership, and to establish criteria to determine:
- The professional development needs of educators
- Information on which to base human capital decisions including rewards and consequences; and
- Whether educators are:
  - Using data to inform decision making;
  - Helping students meet achievement targets and performance expectations;
  - Effectively engaging families; or
  - Collaborating effectively

How was the NEPF created?

The passage of AB 222 during the 2011 Legislative Session created a 15-member Teachers and Leaders Council (TLC) to develop a statewide performance evaluation system for teachers and school administrators. This group was comprised of 11 members selected by the governor from recommendations made by stakeholder groups and 4 approved by the state superintendent and the Nevada System of Higher Education (NSHE) chancellor. These members brought expertise in PreK-12 standards, curriculum, pedagogy, assessment, personnel evaluation, professional development, parent involvement, and public policy, critical elements identified in driving Nevada’s next-generation accountability system. The TLC began meeting in October 2011 and met on more than 25 occasions. The first phase of their work concluded in December 2012 with an appearance before the State Board of Education to begin the regulatory process.

The TLC made a deliberate decision to focus on high leverage instructional practices based on input from guidance by national experts and with the reinforcement of research demonstrating that by narrowing the scope to the assessment of instructional practice and professional development, the TLC will broaden the depth and breadth of the system. The domains were determined by a rigorous review of existing standards, including the Interstate Teacher Assessment and Support Consortium (InTASC) and the National Board for Professional Teaching Standards (NBPTS), as well as examples of other state standards such as Iowa, Colorado, and Delaware. The standards were based on a vast body of empirical evidence demonstrating an immediate and important connection to fostering student success in post-secondary environments by building students’ 21st century skills so that they graduate college and are career-ready. The performance indicators for each standard and the corresponding rubrics were developed by Dr. Margaret Heritage of the University of California, Los Angeles National Center for Research on Evaluation, Standards, and Student Testing.
(CRESST), and her team. The rubrics and associated performance levels to assess the indicators were
designed to look at teacher and student behavior, with a focus on outcomes, not process results. Dr.
Heritage and her team prepared a research synthesis documenting the empirical research supporting the
focus on these five (5) high leverage instructional standards.

Consistent with the legislative charge, the TLC continues to meet to further develop and refine the statewide
performance evaluation system for Nevada educators.

Who is on the Teachers and Leaders Council?

Please refer to the Teachers and Leaders Council Membership page found at
http://www.doe.nv.gov/Boards_Commissions_Councils/Teachers_and_Leaders_Council/Members/.

Who is required to use the NEPF?

All teachers, building administrators and other licensed educational personnel (as defined in the NEPF
Protocols) who are employees of a public school district are required to be evaluated using the NEPF.  This
list is inclusive of teachers across all educational settings and contexts, school level administrators, principal
supervisors, school nurses, school counselors, school psychologists, school social workers, speech-language
pathologists, educational audiologists, and teacher-librarians.

Is the Self-Assessment required?

Yes, completing the self-assessment form will aid in the Goal Setting process. Embracing the self-assessment
step of the process empowers the educator being evaluated to shape the conversation by stating what they
identify as strengths, the areas on which they want to focus, and what support they will need.

What are Student Learning Goals (SLGs) and what is the process for developing one?

SLGs are long-term, measurable, academic goals set for students to accomplish by the end of a course. SLGs
should be horizontally and vertically aligned, when applicable.

To develop horizontally aligned goals, all teachers in the same grade level and/or content area should
collaborate to set SLGs and then each teacher should set specific targets based upon his or her own students’
baseline knowledge and skills. The Goal Setting and Planning Tool is used to guide the process.

Do specialists and non-core educators have to set an SLG based on English and Math?

No, they set SLGs based on their content standards and/or college and career readiness standards (depending
on needs assessment).

Can teachers account for individual learning needs and/or contexts of their classrooms in the
SLG process?

Setting targets for the SLG can be complex. Each teacher should set specific targets based upon his or her
own students’ baseline knowledge and trend data to help set appropriate SLG targets. Targets should be ambitious and feasible for the students identified. Tiered targets may be necessary to address the needs of all students in the class (e.g. students performing in the lowest third of the class may have an alternate end of course target than students performing at higher levels on the baseline assessment).

**What assessments should be used to measure a SLG?**

The Teachers and Leaders Council has recommended that the assessments must meet all of the following criteria:

- Alignment with content standards/Nevada Academic Content Standards (NVACS) and curriculum
- Alignment with the intended level or rigor
- Psychometric quality of validity, and reliability to as high degree as feasible, and
- Monitoring includes alignment, instrument security, reliability, validity, comparability, feasibility and scoring

**Are SLGs allowed to be altered or changed?**

Yes, with evaluator approval. SLGs are meant to be adaptable and responsive to student need. They are not dependent on the availability of statewide standardized assessment scores. They can also be adjusted or revised based on changes in standards, curriculum, student population, and/or student need.

**What is the Professional Practice Goal (PPG) and what should it entail?**

The educator uses the Self-Assessment Tool and/or previous evaluation to identify and set a professional practice goal. The goal should align and provide support for the SLG. Progress toward the PPG should be discussed during the Mid-Cycle Goal Review process.

**What should be discussed in the pre-observation conference?**

The Pre-Observation Conference should precede each scheduled observation cycle. This provides the educator an opportunity to discuss needs and evidence for the strategies used. It is also recommended that the **educator being evaluated leads these discussions** and provides the rationale for the basis of his/her instructional practices. This is also a good time for the educator to discuss the context of their class(es) including, but not necessarily limited to, student to teacher ratio considerations, student characteristics that impact instructional practices, specific procedures the teacher has in place and purpose for the procedures, information from previous lessons and where students are in the continuum etc.

**How long should a scheduled classroom observation be?**

“Scheduled” (announced) observations are those observations for which prior notice is given and a pre-observation conference has been held. The minimum number of scheduled observations is differentiated according to experience and performance as outlined in the Differentiated Evaluation Cycle (Figure 3 of the NEPF Protocols). For teachers, each scheduled classroom observation, as one component of the teacher evaluation, needs to be conducted for a minimum of twenty minutes.

**What is the purpose of the post-observation conference?**
The Post-Observation Conference should be a joint discussion between the educator and evaluator. This is a time during which the evaluator and educator discuss additional evidence related to what happened prior to and after the observation to highlight the continuum of instruction. In addition, the evaluator should provide explicit feedback on performance, and educator professional learning needs are discussed and identified. Based on observations and evidence, if an educator’s performance is likely to be rated ineffective or developing, the evaluator uses the Educator Assistance Plan Tool to develop and implement an assistance plan pursuant to NRS 391.695 and/or 391.715. Early support is best; therefore, this tool should be used to provide assistance to educators at any time during the evaluation cycle.

### Mid-Cycle Goal Review

**Is the Mid-Cycle Goal Review required?**

Yes, a conference should be held mid-year to discuss educator progress towards attaining goals (both the SLG and Professional Practice Goal) and performance on all NEPF Standards and Indicators.

**What should be discussed at the Mid-Cycle Goal Review?**

This step is used to prompt reflection, promote dialogue between the educator and evaluator, and plan changes to practice, and/or goals, as necessary. The Mid-Cycle Goal Review is the time when the educator and evaluator formally meet to discuss students’ progress toward the SLG, and the educator’s performance (including progress toward the Professional Practice Goal) to date. At this time, the educator and evaluator may choose to revise the SLG, if appropriate. In addition, if an educator is having difficulty, the Mid-Cycle review allows the evaluator to provide the educator with the assistance required.

### End of Cycle Summative Evaluation

**What is the purpose of the summative evaluation?**

Thoughtful summative evaluation identifies trends and patterns in performance and offers feedback for improvement. It also provides the educator with valuable information that strengthens self-reflection and analysis skills.

**What is the procedure for observing and evaluating teachers that have achieved highly effective status on their NEPF evaluations for two consecutive years?**

For those who receive a Highly Effective rating for two consecutive years, the final summative evaluation requirement is waived the following year. During the subsequent school year, educators who have met this criterion will continue to participate in the observation cycle, which includes setting a SLG and PPG, for formative evaluation and professional growth purposes.

**How are the scores calculated?**

For the 2019-2020 school year, the TLC has recommended, and State Board has approved, the following domain weights: For teachers and administrators, 65% of Instructional Practice, 20% for Professional Responsibilities, and 15% for Student Learning Goals (SLG).
NEPF FAQs

NEPF Training and Resources

Are trainings available on the NEPF?

Educational personnel are encouraged to review resources offered by the Regional Professional Development Program (RPDP) centers serving Southern, Northeastern, and Northwest Nevada.

NEPF Changes for 2019-2020

How did the 2019 legislative session impact the NEPF?

The passage of SB475 revised Chapter 391 of the Nevada Revised Statutes (NRS). These changes include, but are not limited to, the evaluation of other licensed educational personnel, the reduction of the Student Outcomes Domain weight from 40 to 15 percent, consideration of class size, and revisions regarding the impact of the rating of Developing for probationary and post-probationary employees. Additionally, the Department has been charged to develop an electronic tool for evaluations in collaboration with educational stakeholders and to contract a study of the impact and validity of the statewide performance evaluation system.

For additional questions or comments, please refer to the Nevada Department of Education NEPF Website or contact Kristin Withey at kwithey@doe.nv.gov.
