

ADDING GRADES TO THE PRIVATE SCHOOL LICENSE

While you can get the school's initial license to include all grades which will eventually be offered (assuming all licensing items are met), you will have to decide if you want to list all those grades in the Private Schools Directory on the Nevada Department of Education website.

If you decide to add additional grades to the private school license, you need to submit the licensing items listed below. This does not require going through the State Board of Education process. After the licensing items are reviewed, the State Superintendent will be sent a revised license to sign. Your revised license will then be mailed to you.
